

Dubai Real Estate Intelligence Dashboard

Submitted by: Vedant Jadhav

Tools Used: Power BI

Dataset: Housing Price Dataset

Dashboard:

Insights from the Analysis:

1) Average Pricing Overview

- The average property price is 225K AED, with a price per square foot of 113 AED.

- The most expensive property is priced at 492K AED, while the least expensive is 155 AED.
- Properties average around 2,000 sqft, with the oldest property being 75 years old.

2) Property Categories

- Mid-Range category dominates the market with over 25,000 listings, indicating high buyer preference and availability.
- Budget and High-End categories have similar listing volumes, suggesting a balanced demand across both ends of the spectrum.

3) Price by Neighborhood

- Properties are nearly equally distributed across Urban (33.68%), Rural (33.23%), and Suburb (33.09%) regions.
- This balance implies diverse buyer interests and investment opportunities across various zones of Dubai.

4) Price Trend (Over Time)

- Prices fluctuate between 120M and 180M AED, but the trend line appears mostly stable with slight spikes, indicating a relatively consistent market with minor volatility.
- Notable peaks may correlate with seasonal buying trends or premium listings entering the market.

5) Avg Price Per Sqft by Category

- High-End: 127 AED
- Mid-Range: 117 AED
- Budget: 91 AED
- Insight: High-End properties demand ~40% more per sqft than Budget, showing a strong premium for luxury.

6) Monthly Price Aggregation

- In May and June, total prices summed around 5 billion AED, but July shows a sharp decline to 2 billion AED.
- This suggests a drop in total property listings or buyer activity in July, possibly due to market seasonality, economic cycles, or external factors.
